The panel is made of pure natural marble, which can be in direct contact with food.
After compounded, the utilization rate of the marble is greatly improved. The color difference of marble is greatly reduced which makes the marble more natural and beautiful.

◆ 强度高, 不易破损

大理石复合后, 其抗弯、抗折、抗剪切的强度明显得到提高, 大大降低了运输、安装、使用过程中的破损率。

After the marble compounded, its bending and shear strength is significantly improved, which greatly reduces the damage rate during transportation, installation and use.

◆ 不反碱, 发黄

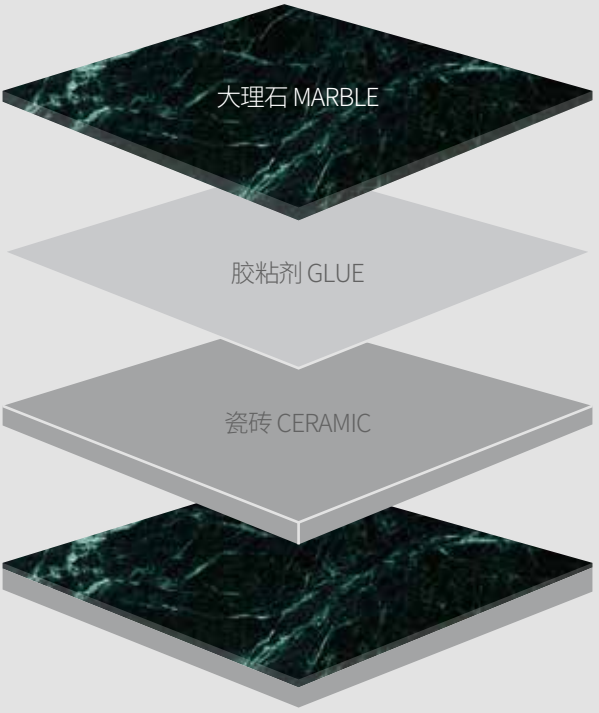

复合石材的底板及树脂胶层阻隔了水及腐蚀物质, 消除了大理石与水泥湿贴后的泛碱泛黄的通病。

Compound material and the resin glue layer block water and corrosive substances, and eliminate the common problem of alkali and yellowing after the wet paste of marble and cement.

◆ 易安装, 节省成本

复合石材可采用瓷砖施工方法, 可大幅降低破碎率及安装成本; 复合石材价格大大低于同品种通体石材, 同样能享用天然石材艺术..
