Universal accessories

Easy - to - disassemble connection

Simplified structure

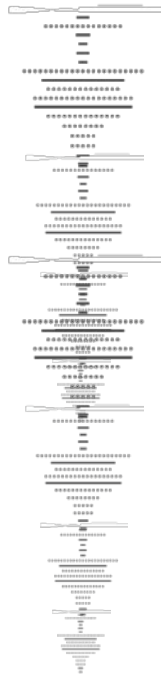
Materials are durable and easy to repair

Bring harmony to your space.
Creativity thrives in a peaceful environment.
Find a balance between sound and silence.

SNAPOD

SNAPOD

The "SNAPOD" private space is like a master artist secluded in the midst of the hustle and bustle. Using modular products as its deft brushstrokes, it paints wonderful scenes with diverse functions within a limited space. The role of a space is to make it more convenient and appealing to users. Therefore, the "SNAPOD" is presented in various forms with a wide range of colors and configurations.



SNAPOD

On this wonderful stage of the building, the independent enclosed spaces are like flexible magic cubes, capable of engaging in a magical interaction with the overall building space. When you need an open public communication area, they seem to be magically concealed and integrated, releasing a spacious and transparent large space where people can move around freely and communicate to their heart's content. When the need for privacy and concentration arises, these "SNAPODs" quickly piece together and divide into small spaces from the whole, as if instantly building private small castles.

Moreover, in these flexibly formed small spaces, the power of technology endows every corner with infinite possibilities. The built - in smart devices can be activated with one click, instantly transforming the small space into an efficient office collaboration pod where people can discuss project details enthusiastically. It can also be quickly switched into a high - definition and smooth remote video conferencing space. Even if they are thousands of miles apart, people can communicate and collaborate as if they were face - to - face, without disturbing others due to space issues, achieving a perfect integration of space utilization and efficient communication.

SNAPOD

In the realm of the office, the "SNAPOD" private space is like a master artist hidden amidst the hustle and bustle. Using modular products as its creative brushstrokes, it paints wonderful scenes with diverse functions within a limited space. It is by no means an ordinary enclosed corner, but rather a container of boundless possibilities, where practicality and playfulness blend seamlessly, injecting vibrant vitality into the office environment.

Material & Specification

- External Size （mm): W1000*D1000*H2300
- Finishes
- External Finising: 0.8mm glavanised with powder coating
- Color: 8 standard colors
- Internal Finishing: 9mm acoustic panel with dark/light grey color
- Floor: carpet*1, adjustable legs*4, casters*4
- Rear Glass: 10mm tempered soundproof glass with black Alum. frame
- Glass Door: 10mm tempered soundproof glass with black Alum. frame

- Power & Accessories
- Power will be equipped as per country CN/US/UK/EU/UNIVERSAL
- Charge station: power socket*1, type A *1, type C *1
- Ventilation Fan*2
- Lighting: LED light (motion sensor)
- Cable: 1.5 Metre Power Cable W/ 13A Plug
- Clothes hook*1 (optional)
- Door hardware: stainless steel lock, handle, hinges, and door closer
